Introduction

The 45 and Up Study recruited 267,357 participants who completed a baseline questionnaire between 2005 and 2009. Of these, 142,548 participants completed a questionnaire at the first round of follow-up (Wave 2; 2012-2015) and 97,302 participants completed a questionnaire at the second round of follow-up (Wave 3; 2018-2020). The third round of follow-up (Wave4; 2023-ongoing) is still ongoing with two of three phases completed so far.

This Data Book provide the prevalence of all variables in the Wave 4 Phase 1 and Phase 2 surveys. Many of the items from the baseline and the first two follow-up questionnaires were repeated. New items relating to gender and sexual orientation, strengthening and balance exercises, sports and concussions, sleep problems, aged care services, among others were added. Derived variables are included, such as BMI and total time spent doing activities. The original variables used to derive these additional variables are available to researchers but not shown in this data book. Cell frequencies less than 6 have been combined to create broader categories, and invalid responses or missing values have been grouped into a 'Missing/Invalid' category. Some cleaning of the responses using the correct skip pattern logic has been undertaken.

Acknowledgements

This research was completed using data collected through the 45 and Up Study. The 45 and Up Study is managed by the [Sax Institute](https://www.saxinstitute.org.au) and supported by strong partnerships with Cancer Council NSW; the Heart Foundation and NSW Ministry of Health.

We thank the many thousands of people participating in the 45 and Up Study. The 45 and Up Study which officially began in 2006 (with a pilot in 2005), is a world class longitudinal research resource with more than a quarter million participants over the age of 45. The data is available to researchers to investigate health and ageing.

The Sax Institute is a national leader in promoting the use of research evidence to improve health and wellbeing by driving the use of research in health policies, programs and services to benefit all Australians. For more information on the 45 and Up Study or the Sax Institute please visit www.saxinstitute.org.au.
